

HELPFUL TIPS FOR SAVING ENERGY AND MONEY

As a business owner or manager, if you had the opportunity to lower your operating costs, wouldn't you take it? Here's your chance.

Simply by investing in energy efficiency improvements, you can reduce your electricity consumption — saving you energy and money. In addition, you may be eligible to participate in an energy efficiency incentive options to receive cash rebates and incentives for the purchase and installation of energy efficient equipment.

Commercial Facility Primary Energy Use Splits

Source: 2008 EIA Buildings Energy Data Book

- Invest in energy efficiency improvements for your facility
- Receive incentives and rebates for purchase and installation of energy efficient equipment
- Reduce your energy usage and electric bills
- Contribute with greener, more sustainable operations

HOW IT WORKS

Pre-Installation Analysis

Work with partner companies and integrators to conduct a pre-installation survey that assesses energy saving opportunities and project potential incentives based on energy savings.

Financing and Administration

If your project is eligible for state or utility rebates and incentives, submit project package for approval and fund reservation.

If financing is required for your project, submit project package for financing alternatives.

Project Implementation

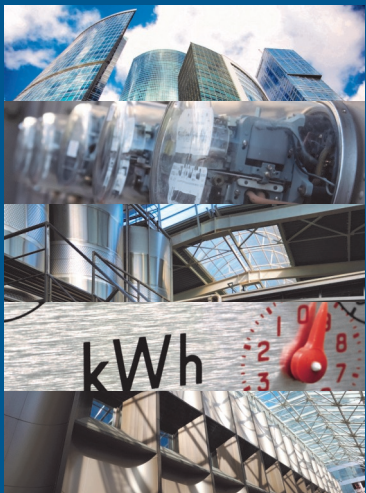

Implement energy efficiency project with partner companies and integrators.

Validation and Payment

Once installation is complete, conduct a post-installation review to validate energy savings. Submit results for state or utility rebates and incentives.

Submit for Tax Deductions

Once installation is complete, submit for applicable state and federal tax deductions on your corporate tax return.

EXAMPLE ENERGY EFFICIENCY REBATE AND INCENTIVE PROGRAMS

State	Number of Energy Efficiency Programs								
	Corporate Tax	Rebates		Grants			Loans		
Illinois		2	16	2	1		1		
Indiana	1	32		1			1		
Kentucky	1	15					3	1	
Michigan		27		1					
Minnesota		83		1	6		5	7	
Ohio		14		1			1	1	1
Pennsylvania		4	1	7	1	2	4	1	5
West Virginia									
Wisconsin		4	13	1			2	3

SAMPLE ENERGY EFFICIENCY MEASURES

Lighting

- Lighting controls upgrade
- Lighting system redesign
- Lighting retrofits - Replace existing T-12 fluorescent lamps and magnetic ballasts with T-8 or T-5 lamps with electronic ballasts
- Electronic dimmable ballasts and day lighting controls
- Incandescent replacement with compact fluorescents or LED products

Supplemental Load Reductions

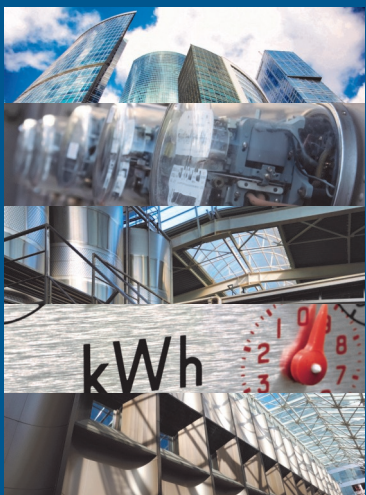

- Power Management Enabling for PCs, Printers, and Copiers
- Turn off Plug Loads at Night
- ENERGY STAR Equipment Office Equipment, Vending Machines

Heating, Ventilation and Air Conditioning (HVAC)

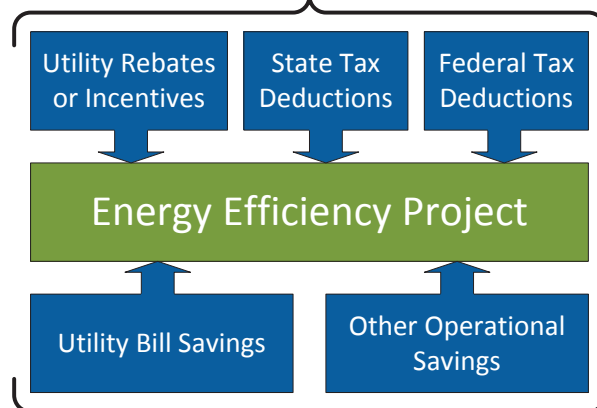

- Energy Recovery or Economizers
- Optimization of Ventilation to Minimum Required for Code
- Building Automation System Upgrades
- HVAC equipment replacement
- Variable speed motors on pumps and fans

Custom

- Thermal Ice Storage
- Retro commissioning of system – equipment replacement and/or operational strategies

One-Time or Multiple Year Benefit

Perpetual Benefit
